

The Bosco Centre	
Policy:	Quality assurance for Qualifications for Awarding Bodies
Applies to:	College and Independent School
Reviewed:	October 2018
Next Review:	October 2019

Intent

Bosco Centre is committed to continuous quality improvement. We believe that the systematic implementation of processes for assessment, internal assurance, standardisation is fundamental to monitoring and improving standards in teaching and learning and ensuring valid, reliable and authentic assessment.

Scope

This policy applies to all – as we all have a responsibility for quality improvement – managers, internal assurers, assessors, tutors, technicians, and learning support staff. It covers all those who are involved in the assessment process who must apply national standards in assessing and assuring

Standards

- Each team or subject area will use universal documentation for assessment and internal assurance of student assessment. Where there is doubt over how this should operate, assessors will seek guidance from the Internal Assurer and QA manager
- Assessment plans and evidence sheets shall be located in the student's file and checked by the IV along with evidence according to the Sampling strategy
- All assessors shall have a named Internal Quality Assurer. Where assessor/internal Quality Assurer's role is in conflict, an impartial IQ will be agreed.
- Internal Quality Assurers will be competent to the level required by the Joint Awarding Body Guidance and Bosco IV policy. They will have achieved the D32/33/34/V units or be working towards this, within a timescale of 1 year.

QA responsibilities

Towards External Assurers

- They will liaise with the External Quality Assurer, agreeing visits, send in on a timely basis the tracking and assessment records to be used for External verification of portfolios of evidence, discuss with EQA's any difficulties they have with setting up visits and assessments for the visit.
- They will follow up with the assessors any action points from the External Quality Assurer's visit, in a timely way.
- They will prepare assessors for the visits, by reviewing action plans from the last EQA report and agreeing with the solutions, arranging for live assessments to be monitored and preparing candidates to be interviewed by the EQA if this is on the EQA planner.

- Explain and have agreed with the EQA any special requirements for candidates in their assessment having firstly obtained evidence of their requirements from assessor and the notes of the learner towards their ILP.

They will ensure a note to this fact is displayed on the learner's portfolio, explaining what kinds of evidence are best used and why, with documentary evidence to back this up.

Towards Assessors – Internal Quality Assurer support for Assessors

- Monitor assessors' decisions and performance
- Monitor compliance with lead bodies criteria
- Monitor accuracy and security of record keeping
- Monitor achievement rates of learners
- Identify a balance of learners to assessors
- Identify any training needs or development of an assessor
- Identify all forms and methods of assessment and record them
- Record all monitoring with the aid of Quality Assurance forms – universal to all qualifications
- Provide written feedback through the monitoring forms – universal
- Monitor that any action plans have been resolved within the reasonable time scale given
- Inform assessors of all updates from the awarding bodies or changes in processes
- PLEASE NOTE – all assessments of written work by a learner must be marked by the assessor in a distinguishing colour, different to the colour used by the learner, the Internal Quality Assurer (RED) and the External
- Verifier (GREEN)

a) Experienced Assessors

- Will be monitored, outlined by the main sampling matrix, used through our computerised system, throughout the academic year and will have their assessments sampled throughout the range of learners/units/modules
- Each assessor will be assigned to a particular IQA who will agree an individual strategy and arrange sample dates in line with the plan, which may be flexible, so long as the number of samples are carried out and they are split throughout the year. This process is determined by the individual course and the scheme of work for each award.
- All the assessors will attend the majority of the meetings and all standardisation meetings
- Each assessor will provide an audit trail of their learners in order for Internal QA to define their sample – recorded on the computerised system, which all assessors must be able to use, and will be given training if they are unsure.
- The IQA will support the assessors designated to them with any appeals or disagreements from their learners according to the appeals and complaints procedures, along with any identification of requirements or needs for

development or training. They will encourage the assessor to produce and update their continuous professional development plan(CPDP)

- All IQAs will give written feedback on the appropriate forms (universal to all qualifications) and monitor any actions identified or any training required.

b) New assessors

All the areas identified for experienced assessors plus the following:

- Each new assessor will complete an induction as soon as feasibly possible after their start date; a monitoring sheet will provide dates when this process takes place and signed by both Assessor and IQA on completion. Copies of these will be filed in the co-ordinators file
- During their first year as assessor, they will be monitored more regularly than the experienced assessors (showing in the computerised sampling record) and will also be mentored where possible by an advanced skills tutor throughout this time.
- They will be expected to complete either a teaching qualification or the appropriate L units (L9-L11-L12-L13) to assess Craft awards.
- They will be expected to complete the A1 award and to assess NVQ awards within 9 months
- The IQA must ensure close monitoring of the new assessor during their initial period of completing any paperwork and the new assessor made aware of the standards of the team and standardisation of assessment decisions.
- All decisions and assessments must be countersigned by a Qualified assessor (This will depend on the type of the award and the status of the new assessor)
- All Assessors and Internal QAs will provide copies of their relevant qualifications and samples of their signatures.
- Copies of all meetings are filed in the QA co-ordinators file and copies sent to each member of the team to update all staff of any standardisation in procedure.
